<b>Extra Information</b>		
The galvanised trunking lids and service boxes should be in position before the screed is poured to ensure the pressure of the screed does not distort the side walls of the trunking.		
The approximate weights given are for pre-galvanised finish only, in kilograms (nominal) and subject to material thickness tolerance.		

## Important:

Screed trunking must be installed on a solid foundation and completely supported across its complete width by a screed ribbon.
